

# Acoustical Wall & Ceiling Panels

**Fresco™ Wall & Ceiling Panels** are a decorative, high-performance, sound absorption product for interior spaces. At its core is an engineered substrate that is manufactured from naturally occurring and/or recycled materials using rapidly-renewable raw materials and bio-based technology. It will not support mold or mildew, is inert, non-combustible, dimensionally stable with solid edges that will not warp or separate. Panels may be installed individually as an accent of color and shape, or together as a grouping. Panels are manufactured to any size specified and come with totally concealed mounting hardware. If changes should occur during installation, alterations are easily performed in the field by the installer.
